Subject index

Absorbance
Sudan Black "B", *Rhodotorula gracilis*, Intracellular lipids, Staining, Oleaginous yeasts, 252
Acacia gum
Ethanol, Chitin, Xylan, Supplement, Polysaccharides, *Saccharomyces*, Sugar cane molasses, 38
Acetaldehyde
Alcohol dehydrogenase, Replication, Membrane, Deactivation, Ethanol, Yeast, Fungi, Plant cell, Bacteria, Inhibition, Toxicity, 130
Activity
Salt, Precipitation, α-Chymotrypsin, 264
Activity loss
Freeze-drying, Starter culture, 765
AD(D)
Side chain cleavage, Sterol, *Mycobacterium* sp., NRRL-B 3683, Cyclodextrin, 398
Adhesion
β-Galactosidase, *Kluyveromyces lactis*, Immobilization, Chitosan, 422
Adsorption
Flannel cloth, Glucose oxidase, Catalase, Polyethylenimine, Egg melange, Desugaring, 617
Agarose
Cell immobilization, Algal polysaccharides, Algin, Carrageenan, Diffusivity, Gels, 706
Agroclavine
Ergot alkaloids, Elymoclavine, Bioconversion, *Claviceps fusiformis*, Immobilization, 685

Air-lift reactor
Bubble column reactor, Rotating drum reactor, Immobilized reactor, Membrane reactor, Plant cell culture, Secondary metabolite production, Mixing, Oxygen transfer, Cell aggregation, Stirred tank reactor, 386
Alcohol
Candida vini, Biosensor, 297
Alcohol dehydrogenase
Ethanol, Yeast, Fungi, Plant cell, Bacteria, Acetaldehyde, Inhibition, Toxicity, Replication, Membrane, Deactivation, 130
Aldehydes
Ketonic acids, 2-keto-3-deoxy-gluconate aldolase, *Aspergillus ustus*, 367
Algae
Bioaccumulation, *Chlorella*, Immobilization, Kinetics, Phosphorus, Uptake, 590
Algal polysaccharides
Cell immobilization, Algin, Agarose, Carrageenan, Diffusivity, Gels, 706
Algin
Cell immobilization, Algal polysaccharides, Agarose Carrageenan, Diffusivity, Gels, 706
Alginate
Solute diffusion, Immobilization of biocatalysts, Gel beads, Carrageenan, 258
Alkaline phosphatase of *E. coli* (EC 3.1.3.1)
Enzyme photoimmobilization, Effective quantum yield, Amplification, Resolving power, 507
Alpha-amylase
Polyol, Thermostability, Enzyme inhibitor, 673
Amino acids photosynthesis
Cofactor regeneration, Photochemical regeneration of NAD(P)H cofactors, Photoinduced biotransformations, Photosensitized NAD(P)H regeneration, CO2-fixation, Photochemical dehydrogenation, Photoinduced H2-evolution, Biocatalysis, Photobiocatalysis, Nitrate reduction, 467
Amplification
Enzyme photoimmobilization, Effective quantum yield, Resolving power, Alkaline phosphatase of *E. coli* (EC 3.1.3.1), 507
α-amylase
Aqueous DMSO, Biopolymer conformation, Amylose, Crystallinity, Enzyme action patterns, 334
Talaromyces emersonii CBS 814.70, β-glucosidase, pH stability, Thermal stability, 370
α-amylase
starch saccharification, Thermophilic *Bacillus* sp. Pullulanase, Pullulan 6-glucanohydrolase, 760
Amylose
Aqueous DMSO, Biopolymer conformation, α-amylase, Crystallinity, Enzyme action patterns, 334
Anchorage-dependent BHK cells
Microcarriers, Kinetic models, Surface properties, 825
Androsta-,4-diene-3,17-dione
Aqueous two-phase system, Steroid transformation, Side-chain degradation, Cholesterol, *Mycobacterium* sp., 752
Antibody
Salmonella, Membrane, Antigen, Detection, 645
Antigen
Salmonella, Membrane, Antibody, Detection, 645
Aqueous
Thermophilic proteins, Protein thermostability, Protein stability, Organic solvent two-phase systems, 568
Aqueous DMSO
Biopolymer conformation, Amylose, α-amylase, Crystallinity, Enzyme action patterns, 334
Aqueous two-phase system
β-galactosidase, Protein A, Fusion protein, Extraction, Poly(ethylene glycol)/potassium phosphate, Biomass, 730
Steroid transformation, Side-chain degradation, *Mycobacterium* sp., Androsta-,4-diene-3,17-dione, Cholesterol, 752
Arthrobacter simplex
20β-Keto reductase, Prednisolone, 20β-hydroxyprednisolone, Nuclear magnetic resonance spectroscopy, Mass spectroscopy, 116
L-asparaginase
Erwinia chrysanthemi, Macrosorb, Cation Exchange, 808
Aspen
Phlebia tremellosa, Delignification, Enzymatic hydrolysis, 803
Aspergillus awamori
Glucoamylase, Cell immobilization, Passive immobilization, Reticulated foam, Spore immobilization, 495
Aspergillus nidulans
Lytic enzymes, Protoplasts, *Trichoderma harzianum*, 21
Aspergillus niger
Aspergillus terreus, Glycanases degrading cellulose and xylan, Induction and substrate specificity of cellulases and β-xylanases, High performance gel filtration chromatography, Electrophoresis and isoelectric focusing of cellulolytic and xylanolytic enyzmes, Isoelectric focusing of hemicellulase system, 610
Lipid profiles, Citric acid biosynthesis, 452
Protoplast fusion, Divergent crosses, 2
Aspergillus terreus
Electrophoresis and isoelectric focusing of cellulolytic and xylanolytic enzymes, *Aspergillus niger*, Isoelectric focusing of hemicellulase system, glycanases degrading cellulose and xylan, Induction and substrate specificity of cellulases and β-xylanases, High performance gel filtration chromatography, 610
Aspergillus ustus
Aldehydes, Ketonic acids, 2-keto-3-deoxy-gluconate aldolase, 367
Asymmetric reduction
Chiral liquid chromatography, Enantiomers, *Saccharomyces cerevisiae*, *Rhodotorula rubra*, *Candida albicans*, 177

Bacilli
Flocculation, Cell retention, Upflow floc fermenter, 597
Bacillus subtilis
Fructosyl transferase activity, Levansucrase, Disaccharide synthesis, Trisaccharide synthesis, Sucrose, 212
Bacteria
Alcohol dehydrogenase, Replication, Membrane, Deactivation, Ethanol, Yeast, Fungi, Plant cell, Acetaldehyde, Inhibition, Toxicity, 130
Bacterial enzymes
Cellulases, Enzyme regulation, Nucleotide sequences, 626
Barley rootlets
5′-Phosphodiesterase, 5′-ribonucleotides, 444
Bicinchoninic acid (BCA)
Cellulases, Fermentation, Flow injection analysis (FIA), On-line detection, Process monitoring, Protein assay, *Trichoderma*, 96
Bioaccumulation
Algae, *Chlorella*, Immobilization, Kinetics, Phosphorus, Uptake, 590
Biocatalysis
Amino acids photosynthesis, Photochemical dehydrogenation, Photoinduced H2-evolution, Photobiocatalysis, Nitrate reduction, Cofactor regeneration, Photochemical regeneration of NAD(P)H cofactors, Photoinduced biotransformations, Photosensitized NAD(P)H regeneration, CO2-fixation, 467
Enzymatic catalysis, Enzyme transformation, Monophastic organic solvents, Supercritical fluids, 194
Biocatalysis in organic media
Reversed micelles, Hydrogenase, Operational stability, 668
Biocatalyst
Nocardia, 3-cyanopyridine, Nitriles, Nicotinic acid, Immobilized cells, Bioreactor, 812
Biocatalysts in organic media
Reversed micelles, Hydrogenase, 6
Biocompatible solvent
Botryoccus braunii, Hydrocarbon-rich microalga, Hydrocarbon recovery, Free cultures, Immobilization in aginate gels and polyurethane foams, 717
Bioconversion
Ergot alkaloids, Agroclavine, Elymoclavine, *Claviceps fusiformis*, Immobilization, 685
Biomass
β-galactosidase, Protein A, Fusion protein, Extraction, Aqueous two-phase system, Poly(ethylene glycol)/potassium phosphate, 730
Biopolymer conformation
Aqueous DMSO, Amylose, α-amylase, Crystallinity, Enzyme action patterns, 334
Bioreactor
Nocardia, 3-cyanopyridine, Nitriles, Nicotinic acid Immobilized cells, Biocatalyst, 812

Recycle, Dense culture, Recombinant *Escherichia coli*, 49
Bioreactors
Catharanthus roseus, Serpentine, Selected cell line, Scale-up, 329
Biosensor
Candida vini, Alcohol, 297
Borohydride reduction of trypsin (amine)-agarose (aldehyde) derivatives
Insolubilization-stabilization of enzymes, 360
Immobilization-stabilization of enzymes, Highly stabilized trypsin derivatives, 360
Botryoccus braunii
Hydrocarbon-rich microalga, Hydrocarbon recovery, Biocompatible solvent, Free cultures, Immobilization in aginate gels and polyurethane foams, 717
Bubble column reactor
Air-lift reactor, Rotating drum reactor, Immobilized reactor, Membrane reactor, Plant cell culture, Secondary metabolite production, Mixing, Oxygen transfer, Cell aggregation, Stirred tank reactor, 386
Bubbles
Gas-liquid interface, Suspended mammalian cells, 230
Butanol fermentation
Product inhibition, Membrane, Extraction, Cell deactivation, 575

Caldocellum saccharolyticum
Thermostable cellulases, Carboxymethyl cellulase, β-glucosidase, Xylanase, β-xylosidase, Heat treatment, Protein purification, Denaturation, 113
Calorimetry
Chemostat, Continuous culture, Heat yield, Maintenance energy dissipation, 12
Candida albicans
Chiral liquid chromatography, Enantiomers, Asymmetric reduction, *Saccharomyces cerevisiae*, *Rhodotorula rubra*, 177
Candida vini
Alcohol, Biosensor, 297
Carboxymethyl cellulase
Thermostable cellulases, β-glucosidase, Xylanase, β-xylosidase, Heat treatment, Protein purification, Denaturation, *Caldocellum saccharolyticum*, 113
Carboxypeptidase Y
Immobilized carboxypeptidase Y, Chemically modified carboxypeptidase Y, Deamidation, Enzymatic peptide synthesis, 74
Carrageenan
Cell immobilization, Algal polysaccharides, Algin, agarose, Diffusivity, Gels, 706
Solute diffusion, Immobilization of biocatalysts, Gel beads, Alginate, 258
Catalase
Flannel cloth, Glucose oxidase, Polyethylenimine, Adsorption, Egg melange, Desugaring, 617
Catharanthus roseus
Serpentine, Selected cell line, Scale-up, Bioreactors, 329
Cation Exchange
Erwinia chrysanthemi, L-asparaginase, Macrosorb, 808
Cell aggregation
Bubble column reactor, Air-lift reactor, Rotating drum reactor, Immobilized reactor, Membrane reactor, Plant cell culture, Secondary metabolite production, Mixing, Oxygen transfer, Stirred tank reactor, 386
Cell deactivation
Butanol fermentation, Product inhibition, Membrane, Extraction, 575
Cell immobilization
Algal polysaccharides, Algin, agarose, carrageenan, Diffusivity, Gels, 706
Glucoamylase, *Aspergillus awamori*, Passive immobilization, Reticulated foam, Spore immobilization, 495
Cellobiohydrolase
Exocellulase, *Sporotrichum thermophile*, Enzymes, 220
Cellobiose
β-Glucosidase gene, Cloning, Expression, *Cellulomonas fimi*, pUC9, PNPG, Glucose, Phosphorylase, 313
Cell retention
Bacilli, Flocculation, Upflow floc fermenter, 597
Cellulase
Exocellobiohydrolase, *Talaromyces emersonii*, Methylumbelliferyl β-D-cellobiopyranoside, 17
Xylanase, *Trichoderma longibrachiatum*, Hemicellulase, 405
C1 Cellulase
β-glucosidase, Cx cellulase, Endopolygalacturonase, Filamentous fungi, Plant cell biomass, 736
Cx Cellulase,
β-glucosidase, C1 cellulase, Endopolygalacturonase, Filamentous fungi, Plant cell biomass, 736
Cellulases
Bacterial enzymes, Enzyme regulation, Nucleotide sequences, 626
Bicinchoninic acid (BCA), Fermentation, Flow injection analysis (FIA), On-line detection, Process monitoring, Protein assay, *Trichoderma*, 96
Cellulomonas fimi
β-Glucosidase gene, Cloning, Expression, pUC9, Cellobiose, PNPG, Glucose, Phosphorylase, 313
Cellulose
Fusarium oxysporum, Ethanol, Fermentation, 236
Chemically modified carboxypeptidase Y
Carboxypeptidase Y, Immobilized carboxypeptidase Y, Deamidation, Enzymatic peptide synthesis, 74
Chemical modification
Lipase, Hydrolysis, Esterification, Ester exchange, Organic solvent, 44
Chemostat
Calorimetry, Continuous culture, Heat yield, Maintenance energy dissipation, 12
Chiral liquid chromatography
Enantiomers, Asymmetric reduction, *Saccharomyces cerevisiae*, *Rhodotorula*, *Candida albicans*, 177
Chitin
Ethanol, Acacia gum, Xylan, Supplement, Polysaccharides, *Saccharomyces*, Sugar cane molasses, 38
Chitinase
Chitobiase, Purification, *Serratia liquefaciens*, Fermentation, 289
Chitobiase
Chitinase, Purification, *Serratia liquefaciens*, Fermentation, 289
Chitosan
β-Galactosidase, *Kluyveromyces lactis*, Immobilization, Adhesion, 422
Chlorella
Algae, Bioaccumulation, Immobilization, Kinetics, Phosphorus, Uptake, 590
Cholesterol
Aqueous two-phase system, Steroid transformation, Side-chain degradation, *Mycobacterium* sp., Androsta-,4-diene-3,17-dione, 752
α-Chymotrypsin
Microgels, Enzyme supports, Sulfatase, Esterase, Organic media, 657
Salt, Precipitation, Activity, 264
Citric acid biosynthesis
Lipid profiles, *Aspergillus niger*, 452
Citronellol
Horseradish peroxidase, Oxidation, 436
Clarification process
Pectinesterase, Endo-D-polygalacturonase, Immobilized pectic enzymes, Coimmobilization of multienzyme systems, 831
Claviceps fusiformis
Ergot alkaloids, Agroclavine, Elymoclavine, Bioconversion, Immobilization, 685
Cloning
β-Glucosidase gene, Expression, *Cellulomonas fimi*, pUC9, Cellobiose, PNPG, Glucose, Phosphorylase, 313
CMCase
Robillarda, Protoplast, Regenerants, β-glucosidase, 696
CO2-fixation
Amino acids photosynthesis, Photochemical dehydrogenation, Photoinduced H2-evolution, Biocatalysis, Photobiocatalysis, Nitrate reduction, Cofactor regeneration, Photochemical regeneration of NAD(P)H cofactors, Photoinduced biotransformations, Photosensitized NAD(P)H regeneration, 467
Cofactor regeneration
Amino acids photosynthesis, Photochemical dehydrogenation, Photoinduced H2-evolution, Biocatalysis, Photobiocatalysis, Nitrate reduction, Photochemical regeneration of NAD(P)H cofactors, Photoinduced biotransformations, Photosensitized NAD(P)H regeneration, CO2-fixation, 467
Coimmobilization of multienzyme systems
Clarification process, Pectinesterase, Endo-D-polygalacturonase, Immobilized pectic enzymes, 831

Complementation
Saccharomyces cerevisiae, Xylulokinase gene, *E. coli*, Xylulose, Yeast xylulokinase mutant, Plasmid, 417
Constitutive endoxylanase
Sclerotium rolfsii, Mutant, 678
Continuous culture
Calorimetry, Chemostat, Heat yield, Maintenance energy dissipation, 12
Crushing strength
Invertase, Yeast cells, Polyacrylamide, Radiation polymerization, 376
Crystallinity
Aqueous DMSO, Biopolymer conformation, Amylose, α-amylase, Enzyme action patterns, 334
Culture
Hemoglobin, Hydrosylates, Nitrogen source, Protozoa, *Tetrahymena*, 165
3-cyanopyridine
Nitriles, *Nocardia*, Nicotinic acid, Immobilized cells, Biocatalyst, Bioreactor, 812
Cyclodextrin
Side chain cleavage, Sterol, AD(D), *Mycobacterium* sp., NRRL-B 3683, 398

Deactivation
Ethanol, Yeast, Fungi, Plant cell, Bacteria, Acetaldehyde, Inhibition, Toxicity, Alcohol dehydrogenase, Replication, Membrane, 130
Deamidation
Carboxypeptidase Y, Immobilized carboxypeptidase Y, Chemically modified carboxypeptidase Y, Enzymatic peptide synthesis, 74
Dehalogenase
Immobilization, Hollow fiber reactor, 725
Delignification
Lignocellulose, Solid-state fermentation, Digestibility, 786
Phlebia tremellosa, Aspen, Enzymatic hydrolysis, 803
Denaturation
Thermostable cellulases, Carboxymethyl cellulase, β-glucosidase, Xylanase, 113
β-xylosidase, Heat treatment, Protein purification, *Caldocellum saccharolyticum*
Dense culture
Bioreactor, Recycle, Recombinant *Escherichia coli*, 49
Desugaring
Flannel cloth, Glucose oxidase, Catalase, Polyethylenimine, Adsorption, Egg melange, 617
Detection
Salmonella, Membrane, Antigen, Antibody, 645
Dextran
Dextranase, *Penicillium aculateum*, 533
Dextranase
Penicillium aculateum, Dextran, 533
Diafiltration
Poly(ethylene glycol)4000, β-galactosidase, Plate and frame system, Hollow fiber system, 744
Diffusivity
Cell immobilization, Algal polysaccharides, Algin, Agarose, Carrageenan, Gels, 706
Digestibility
Lignocellulose, Delignification, Solid-state fermentation, 786
Digitonin
Kluyveromyces fragilis, β-galactosidase, Permeabilization, Lactose, 439
Disaccharide synthesis
Fructosyl transferase activity, Levansucrase, Trisaccharide synthesis, Sucrose, *Bacillus subtilis*, 212
Disproportionation reactions
Fructo-oligosaccharides, Fructosyltransferase, Reaction mechanism, Mathematical model, 491
Divergent crosses
Aspergillus niger, Protoplast fusion, 2

E. coli
Saccharomyces cerevisiae, Xylulokinase gene, Complementation, Xylulose, Yeast xylulokinase mutant, Plasmid, 417
Effective quantum yield
Enzyme photoimmobilization, Amplification, 4, Alkaline phosphatase of *E. coli* (EC3.1.3.1), Resolving power, 507
Egg melange
Flannel cloth, Glucose oxidase, Catalase, Polyethylenimine, Adsorption, Desugaring, 617
Electronic pressure sensor
Microbial growth, Hollow fiber reactor, *Streptococcus faecalis* var. *zymogenes*, 283
Electrophoresis and isoelectric focusing of cellulolytic and xylanolytic enzymes
Aspergillus niger, Isoelectric focusing of hemicellulase system, *Aspergillus terreus*, glycanases degrading cellulose and xylan, Induction and substrate specificity of cellulases and β-xylanases, 610
Elymoclavine
Ergot alkaloids, Agroclavine, Bioconversion, *Claviceps fusiformis*, Immobilization, 685
Enantiomers
Chiral liquid chromatography, Asymmetric reduction, *Saccharomyces cerevisiae*, *Rhodotorula rubra*, *Candida albicans*, 177
Endo-D-polygalacturonase
Clarification process, Pectinesterase, Immobilized pectic enzymes, Coimmobilization of multienzyme systems, 831
Endopolygalacturonase
C1 cellulase, Cx cellulase, β-glucosidase, Filamentous fungi, Plant cell biomass, 736
Enzymatic catalysis
Biocatalysis, Enzyme transformation, Monophastic organic solvents, Supercritical fluids, 194
Enzymatic hydrolysis
Phlebia tremellosa, Delignification, Aspen, 803
Enzymatic peptide synthesis
Carboxypeptidase Y, Immobilized carboxypeptidase Y, Chemically modified carboxypeptidase Y, Deamidation, 74
Enzyme action patterns
Aqueous DMSO, Biopolymer conformation, Amylose, α-amylase, Crystallinity, 334
Enzyme activity
α-Mannosidase, Reversion reaction, Enzyme stability, 347
Enzyme activity sensor
Glucose oxidase, Lactic dehydrogenase, Pyruvate oxidase, Glucose, Lactic acid, 820
Enzyme adsorption
Trichoderma reesei, Steam pretreatment, Saccharification, Wheat straw, 500
Enzyme immobilization
Enzyme stabilization, 306
Enzyme inhibitor
Alpha-amylase, Polyol, Thermostability, 673
Enzyme photoimmobilization
Effective quantum yield, Amplification, Resolving power, Alkaline phosphatase of *E. coli* (EC 3.1.3.1), 507
Enzyme regulation
Cellulases, Bacterial enzymes, Nucleotide sequences, 626
Enzymes
Exocellulase, *Sporotrichum thermophile*, Cellobiohydrolase, 220
Enzyme stability
α-Mannosidase, Reversion reaction, Enzyme activity, 347
Enzyme stabilization
Enzyme immobilization, 306
Enzyme-support multipoint attachment
Immobilization of trypsin, Stabilization of trypsin, Trypsin (amine)-agarose (aldehyde) multiinteraction, 353
Enzyme supports
Microgels, α-chymotrypsin, Sulfatase, Esterase, Organic media, 657
Enzyme transformation
Enzymatic catalysis, Biocatalysis, Monophastic organic solvents, Supercritical fluids, 194
Equilibrium shift
Extractive catalysis, Two-phase system, Reverse micelle, Hydrolytic reaction, 84
Ergot alkaloids
Agroclavine, Elymoclavine, Bioconversion, *Claviceps fusiformis*, Immobilization, 685
Erwinia chrysanthemi
L-asparaginase, Macrosorb, Cation Exchange, 808
Escherichia coli
Thermophilic anaerobe, β-galactosidase, Molecular cloning, Thermostable enzyme, 302
Esterase
Microgels, Enzyme supports, α-chymotrypsin, Sulfatase, Organic media, 657
Ester exchange
Lipase, Chemical modification, Hydrolysis, Esterification, Organic solvent, 44

Esterification
Lipase, Chemical modification, Hydrolysis, Ester exchange, Organic solvent, 44
Ethanol
Chitin, Acacia gum, Xylan, Supplement, Polysaccharides, *Saccharomyces*, Sugar cane molasses, 38
Membrane, Deactivation, Alcohol dehydrogenase, Replication, Yeast, Fungi, Plant cell, Bacteria Acetaldehyde, Inhibition, Toxicity, 130
Fusarium oxysporum, Cellulose, Fermentation, 236
Xylose fermentation, Spent sulfite liquor, Yeasts, *Pichia stipitis*, 240
Yeast, Thermotolerance, nutrients, 411
Exocellobiohydrolase
Cellulase, *Talaromyces emersonii*, Methylumbelliferyl β-D-cellobiopyranoside, 17
Exocellulase
Sporotrichum thermophile, Cellobiohydrolase, Enzymes, 220
Exported proteins
Neurospora crassa, Fungal amylases, 692
Expression
β-Glucosidase gene, Cloning, *Cellulomonas fimi*, pUC9, Cellobiose, PNPG, Glucose, Phosphorylase, 313
β-Lactamase, Protein A, Hybrid protein, IgG binding, 559
Extracellular enzymes
Ligninase, Lignin peroxidase, Lignin biodegradation, Hemeproteins, Glycosylation, White rot, Wood decay, Peptide analysis, 322
Extraction
Butanol fermentation, Product inhibition, Membrane, Cell deactivation, 575
β-galactosidase, Protein A, Fusion protein, Aqueous two-phase system, Poly(ethylene glycol)/potassium phosphate, Biomass, 730
Extractive catalysis
Two-phase system, Equilibrium shift, Reverse micelle, Hydrolytic reaction, 84

Fermentation
Bicinchoninic acid (BCA), Cellulases, Flow injection analysis (FIA), On-line detection, Process monitoring, Protein assay, *Trichoderma*, 96
Chitobiase, Chitinase, Purification, *Serratia liquefaciens*, 289
Fusarium oxysporum, Ethanol, Cellulose, 236
Lignocellulose, Hydrosylate, Yeast, Xylose isomerase, 583
Filamentous fungi
C1 cellulase, Cx cellulase, β-glucosidase, Endopolygalacturonase Plant cell biomass, 736
Fish
Polarography, Freshness, Metabolite, Uric acid, 277
Flannel cloth
Glucose oxidase, Catalase, Polyethylenimine, Adsorption, Egg melange, Desugaring, 617
Flocculation
Bacilli, Cell retention, Upflow floc fermenter, 597
Flow injection analysis (FIA)
Bicinchoninic acid (BCA), Cellulases, Fermentation, On-line detection, Process monitoring, Protein assay, *Trichoderma*, 96
Food antioxidant
Tannase, Tannin, Reverse micelles, Propyl gallate, Transesterification, 604
Free cultures
Botryoccus braunii, Hydrocarbon-rich microalga, Hydrocarbon recovery, Biocompatible solvent, Immobilization in aginate gels and polyurethane foams, 717
Freeze-drying
Starter culture, Activity loss, 765
Freshness
Polarography, Fish, Metabolite, Uric acid, 277
Fructo-oligosaccharides
Fructosyltransferase, Disproportionation reactions, Reaction mechanism, Mathematical model, 491
Fructosyltransferase
Fructo-oligosaccharides, Disproportionation reactions, Reaction mechanism, Mathematical model, 491
Fructosyl transferase activity
Levansucrase, Disaccharide synthesis, Trisaccharide synthesis, Sucrose, *Bacillus subtilis*, 212
Fungal amylases
Exported proteins, *Neurospora crassa*, 692
Fungi
Alcohol dehydrogenase, Replication, Membrane, Deactivation, Ethanol, Yeast, Plant cell, Bacteria, Acetaldehyde, Inhibition, Toxicity, 130
Fungus
Solid-state fermentation, Sawdust, *Gloeophyllum trabeum*, 511
Fusarium oxysporum
Ethanol, Cellulose, Fermentation, 236
Fusion protein
β-galactosidase, Protein A Extraction Aqueous two-phase system Poly(ethylene glycol)/potassium phosphate, Biomass, 730

β-galactosidase
Diafiltration, Poly(ethylene glycol)4000, Plate and frame system, Hollow fiber system, 744 *Kluyveromyces fragilis*, Permeabilization, Digitonin, Lactose, 439
Kluyveromyces lactis, Immobilization, Adhesion, Chitosan, 422
Protein A, Fusion protein, Extraction, Aqueous two-phase system, Poly(ethylene glycol)/potassium phosphate, Biomass, 730
Thermophile, *Thermoanaerobacter*, 180
Thermophilic anaerobe, *Escherichia coli*, Molecular cloning, Thermostable enzyme, 302
Gas-liquid interface
Suspended mammalian cells, Bubbles, 230
Gastric juice
Microcapsules, Invertase, 247
Gel beads
Solute diffusion, Immobilization of biocatalysts, Alginate, Carrageenan, 258
Gels
Cell immobilization, Algal polysaccharides, Algin, Agarose, Carrageenan, Diffusivity, 706
Gene expression
Streptokinase, Plasminogen activation, *Pichia pastoris*, Thrombolysis, 650
Geotrichum candidum
Lipase, Muitiple forms, Immunoelectrophoresis, 90
Gloeophyllum trabeum
Solid-state fermentation, Sawdust, Fungus, 511
Glucoamylase
Aspergillus awamori, Cell immobilization, Passive immobilization, Reticulated foam, Spore immobilization, 495
Starch, Ultrafiltration reactor, Saccharification, 154
Gluconic acid
Gluconobacter oxydans, Glucose metabolism Quinoproteins, 160
Gluconobacter oxydans
Gluconic acid, Glucose metabolism, Quinoproteins, 160
Glucose
Enzyme activity sensor, Glucose oxidase, Lactic dehydrogenase, Pyruvate oxidase, Lactic acid, 820
β-Glucosidase gene, Cloning, Expression, *Cellulomonas fimi*, pUC9, Cellobiose, PNPG, Phosphorylase, 313
Glucose-6-phosphate
Polyphosphate : glucose-6-phosphotransferase, Inorganic polyphosphates, *Mycobacterium* sp., Immobilized enzyme reactor, 518
Glucose isomerase
Lactase, Immobilization, SiO2-carrier, 26
Glucose metabolism
Gluconobacter oxydans, Gluconic acid, Quinoproteins, 160
Glucose oxidase
Enzyme activity sensor, Lactic dehydrogenase, Pyruvate oxidase, Glucose, Lactic acid, 820
Flannel cloth, Catalase, Polyethylenimine, Adsorption, Egg melange, Desugaring, 617
β-glucosidase
α-Amylase, *Talaromyces emersonii* CBS 814.70, pH stability, Thermal stability, 370
C1 cellulase, Cx cellulase Endopolygalacturonase, Filamentous fungi, Plant cell biomass, 736
Immobilization, *Myceliophthora Thermophila* D-14, 431
Robillarda, Protoplast, Regenerants, CMCase, 696
Thermostable cellulases, Carboxymethyl cellulase, Xylanase, β-xylosidase, Heat treatment, Protein purification, Denaturation, *Caldocellum saccharolyticum*, 113

β-Glucosidase gene
Cloning, Expression, *Cellulomonas fimi*, pUC9, Cellobiose, PNPG, Glucose, Phosphorylase, 313
Glycanases degrading cellulose and xylan
Aspergillus terreus, Induction and substrate specificity of cellulases and β-xylanases, High performance gel filtration chromatography, Electrophoresis and isoelectric focusing of cellulolytic and xylanolytic enzymes, *Aspergillus niger*, Isoelectric focusing of hemicellulase system, 610
Glycosylation
Ligninase, Lignin peroxidase, Lignin biodegradation, Hemeproteins, Extracellular enzymes, White rot, Wood decay, Peptide analysis, 322
Growth
Hybridomas, Packed-bed reactors, Immobilization, Metabolism, 341

Heat treatment
Carboxymethyl cellulase, β-glucosidase, Thermostable cellulases, Xylanase, β-xylosidase, Protein purification, Denaturation, *Caldocellum saccharolyticum* 113
Heat yield
Calorimetry, Chemostat, Continuous culture, Maintenance energy dissipation, 12
Hemeproteins
Ligninase, Lignin peroxidase, Lignin biodegradation, Glycosylation, Extracellular enzymes, White rot, Wood decay, Peptide analysis, 322
Hemicellulase
Xylanase, *Trichoderma longibrachiatum*, Cellulase, 405
Hemoglobin
Hydrosylates, Nitrogen source, Protozoa, *Tetrahymena*, Culture, 165
2-heptanone
Penicillium roqueforti, Methyl-ketone, Immobilized spores, 106
Highly stabilized trypsin derivatives
Insolubilization-stabilization of enzymes, Immobilization-stabilization of enzymes, Borohydride reduction of trypsin (amine)-agarose (aldehyde) derivatives, 360
High performance gel filtration chromatography
Aspergillus terreus, glycanases degrading cellulose and xylan, Induction and substrate specificity of cellulases and β-xylanases, Electrophoresis and isoelectric focusing of cellulolytic and xylanolytic enzymes, *Aspergillus niger*, Isoelectric focusing of hemicellulase system, 610
Hollow fiber reactor
Dehalogenase, Immobilization, 725
Microbial growth, Electronic pressure sensor, *Streptococcus faecalis* var. *zymogenes*, 283
Hollow fiber system
Diafiltration, Poly(ethylene glycol)4000, β-galactosidase, Plate and frame system, 744
Horseradish peroxidase
Citronellol, Oxidation, 436

Hybridomas
Packed-bed reactors, Immobilization, Growth, Metabolism, 341
Hybrid protein
β-Lactamase, Protein A, Expression, IgG binding, 559
Hydrocarbon recovery
Botryoccus braunii, Hydrocarbon-rich microalga, Biocompatible solvent, Free cultures, Immobilization in aginate gels and polyurethane foams, 717
Hydrocarbon-rich microalga
Botryoccus braunii, Hydrocarbon recovery, Biocompatible solvent, Free cultures, Immobilization in aginate gels and polyurethane foams, 717
Hydrogenase
Reversed micelles, Biocatalysis in organic media, Operational stability, 668
Reversed micelles, Biocatalysts in organic media, 6
Hydrolysis
Lipase, Chemical modification, Esterification, Ester exchange, Organic solvent, 44
Palm kernel olein, Reversed micelle, 528
Hydrolytic reaction
Extractive catalysis, Two-phase system, Equilibrium shift, Reverse micelle, 84
Hydrosylate
Fermentation, Lignocellulose, Yeast, Xylose isomerase, 583
Hydrosylates
Hemoglobin, Nitrogen source, Protozoa, *Tetrahymena*, Culture, 165
20β-hydroxyprednisolone
20β-Keto reductase, *Arthrobacter simplex*, Prednisolone, Nuclear magnetic resonance spectroscopy, Mass spectroscopy, 116

IgG binding
β-Lactamase, Protein A, Hybrid protein, Expression, 559
Immobilization
Algae, Bioaccumulation, *Chlorella*, Kinetics, Phosphorus, Uptake, 590
Dehalogenase, Hollow fiber reactor, 725
Ergot alkaloids, Agroclavine, Elymoclavine, Bioconversion, *Claviceps fusiformis*, 685
β-Galactosidase, *Kluyvermyces lactis*, Adhesion, Chitosan, 422
β-glucosidase, *Myceliophthora thermophila* D-14, 431
Hybridomas, Packed-bed reactors, Growth, Metabolism, 341
Lactase, Glucose isomerase, SiO2-carrier, 26
Review, Plant cells, 546
Immobilization in aginate gels and polyurethane foams
Botryoccus braunii, Hydrocarbon-rich microalga, Hydrocarbon recovery, Biocompatible solvent, Free cultures, 717
Immobilization of biocatalysts
Solute diffusion, Gel beads, Alginate, Carrageenan, 258

Immobilization of trypsin
Stabilization of trypsin, Trypsin (amine)-agarose(aldehyde) multiinteraction, Enzyme-support multipoint attachment, 353
Immobilization-stabilization of enzymes
Insolubilization-stabilization of enzymes, Borohydride reduction of trypsin (amine)-agarose (aldehyde) derivatives, Highly stabilized trypsin derivatives, 360
Immobilized carboxypeptidase Y
Carboxypeptidase Y, Chemically modified carboxypeptidase Y, Deamidation, Enzymatic peptide synthesis, 74
Immobilized cells
Nocardia, 3-cyanopyridine, Nitriles, Nicotinic acid, Biocatalyst, Bioreactor, 812
Immobilized enzyme reactor
Polyphosphate : glucose-6-phosphotransferase, Glucose-6-phosphate, Inorganic polyphosphates, *Mycobacterium* sp., 518
Immobilized pectic enzymes
Clarification process, Pectinesterase, Endo-D-polygalacturonase, Coimmobilization of multienzyme systems, 831
Immobilized reactor
Bubble column reactor, Air-lift reactor, Rotating drum reactor, Membrane reactor, Plant cell culture, Secondary metabolite production, Mixing, Oxygen transfer, Cell aggregation, Stirred tank reactor, 386
Immobilized spores
Penicillium roqueforti, Methyl-ketone, 2-heptanone, 106
Immunoelectrophoresis
Geotrichum candidum, Lipase, Multiple forms, 90
Induction and substrate specificity of cellulases and β-xylanases
Aspergillus terreus, glycanases degrading cellulose and xylan, High performance gel filtration chromatography, Electrophoresis and isoelectric focusing of cellulolytic and xylanolytic enzymes, *Aspergillus niger*, Isoelectric focusing of hemicellulase system, 610
Inhibition
Alcohol dehydrogenase, Replication, Membrane, Deactivation, Ethanol, Yeast, Fungi, Plant cell, Bacteria, Acetaldehyde, Toxicity, 130
Microbes, Kinetics, 66
Inorganic polyphosphates
Polyphosphate : glucose-6-phosphotransferase, Glucose-6-phosphate, *Mycobacterium* sp., Immobilized enzyme reactor, 518
Insolubilization-stabilization of enzymes
Immobilization-stabilization of enzymes, Borohydride reduction of trypsin (amine)-agarose (aldehyde) derivatives, Highly stabilized trypsin derivatives, 360
Intracellular lipids
Sudan Black "B", *Rhodotorula gracilis*, Staining, Absorbance, Oleaginous yeasts, 252

Invertase
Gastric juice, Microcapsules, 247
Yeast cells, Polyacrylamide, Radiation polymerization, Crushing strength, 376
Isoelectric focusing of hemicellulase system
Aspergillus terreus, glycanases degrading cellulose and xylan, Induction and substrate specificity of cellulases and β-xylanases, High performance gel filtration chromatography, Electrophoresis and isoelectric focusing of cellulolytic and xylanolytic enzymes, *Aspergillus niger*, 610

2-keto-3-deoxy-gluconate aldolase
Aldehydes, Ketonic acids, *Aspergillus ustus*, 367
Ketonic acids
Aldehydes, 2-keto-3-deoxy-gluconate aldolase, *Aspergillus ustus*, 367
20β-Keto reductase
Arthrobacter simplex, Prednisolone, 20β-hydroxyprednisolone, Nuclear magnetic resonance spectroscopy, Mass spectroscopy, 116
Kinetic models
Anchorage-dependent BHK cells, Microcarriers, Surface properties, 825
Kinetics
Algae, Bioaccumulation, *Chlorella*, Immobilization, Phosphorus, Uptake, 590
Microbes, Inhibition, 66
Kluyveromyces fragilis
β-galactosidase, Permeabilization, Digitonin, Lactose, 439
Kluyveromyces lactis
β-Galactosidase, Immobilization, Adhesion, Chitosan, 422

β-Lactamase
Protein A, Hybrid protein, Expression, IgG binding, 559
Lactase
Glucose isomerase, Immobilization, SiO2-carrier, 26
Lactic acid
Enzyme activity sensor, Glucose oxidase, Lactic dehydrogenase, Pyruvate oxidase, Glucose, 820
Lactic dehydrogenase
Enzyme activity sensor, Glucose oxidase, Pyruvate oxidase, Glucose, Lactic acid, 820
Lactose
Kluyveromyces fragilis, β-galactosidase, Permeabilization, Digitonin, 439
Levansucrase
Fructosyl transferase activity, Disaccharide synthesis, Trisaccharide synthesis, Sucrose, *Bacillus subtilis*, 212
Ligninase
Lignin peroxidase, Lignin biodegradation, Hemeproteins, Glycosylation, Extracellular enzymes, White rot, Wood decay, Peptide analysis, 322
Lignin biodegradation
Ligninase, Lignin peroxide, Hemeproteins, Glycosolation, Extracellular enzymes, White rot, Wood decay, Peptide analysis, 322
Lignin peroxidase
Ligninase, Lignin biodegradation, Hemeproteins, Glycosylation, Extracellular enzymes, White rot, Wood decay, Peptide analysis, 322
Lignocellulose
Delignification, Solid-state fermentation, Digestibility, 786
Fermentation, Hydrosylate, Yeast, Xylose isomerase, 583
Lipase
Chemical modification, Hydrolysis, Esterification, Ester exchange, Organic solvent, 44
Geotrichum candidum, Multiple forms, Immunoelectrophoresis, 90
Lipid profiles
Aspergillus niger, Citric acid biosynthesis, 452
Lytic enzymes
Protoplasts, *Trichoderma harzianum*, *Aspergillus nidulans*, 21

Macrosorb
Erwinia chrysanthemi, L-asparaginase, Cation Exchange, 808
Maintenance energy dissipation
Calorimetry, Chemostat, Continuous culture, Heat yield, 12
α-Mannosidase
Reversion reaction, Enzyme activity, Enzyme stability, 347
Mass spectroscopy
20β-Keto reductase, *Arthrobacter simplex*, Prednisolone, 20β-hydroxyprednisolone, Nuclear magnetic resonance spectroscopy, 116
Mathematical model
Fructo-oligosaccharides, Fructosyltransferase, Disproportionation reactions, Reaction mechanism, 491
Mean diameter
Microcapsule, Size distribution, Microencapsulation, 29
Medium conductivity measurement
Plant cell culture, Monitoring of cell growth, 170
Membrane
Butanol fermentation, Product inhibition, Extraction, Cell deactivation, 575
Ethanol, Yeast, Fungi, Plant cell, Bacteria, Acetaldehyde, Inhibition, Toxicity, Alcohol dehydrogenase, Replication, Deactivation, 130
Salmonella, Antigen, Antibody, Detection, 645
Membrane reactor
Bubble column reactor, Air-lift reactor, Rotating drum reactor, Immobilized reactor, Plant cell culture, Secondary metabolite production, Mixing, Oxygen transfer, Cell aggregation, Stirred tank reactor, 386
Metabolism
Hybridomas, Packed-bed reactors, Immobilization, Growth, 341
Metabolite
Polarography, Fish, Freshness, Uric acid, 277
Methyl-ketone
Penicillium roqueforti, 2-heptanone, Immobilized spores, 106
Methylumbelliferyl β-D-cellobiopyranoside
Cellulase, Exocellobiohydrolase, *Talaromyces emersonii*, 17
Microbes
Inhibition, Kinetics, 66
Microbial growth
Hollow fiber reactor, Electronic pressure sensor, *Streptococcus faecalis* var. *zymogenes*, 283
Microcapsule
Mean diameter, Size distribution, Microencapsulation, 29
Microcapsules
Gastric juice, Invertase, 247
Microcarriers
Anchorage-dependent BHK cells, Kinetic models, Surface properties, 825
Microencapsulation
Microcapsule, Mean diameter, Size distribution, 29
Microgels
Enzyme supports, α-chymotrypsin, Sulfatase, Esterase, Organic media, 657
Mixing
Bubble column reactor, Air-lift reactor, Rotating drum reactor, Immobilized reactor, Membrane reactor, Plant cell culture, Secondary metabolite production, Oxygen transfer, Cell aggregation, Stirred tank reactor, 386
Molecular cloning
Thermophilic anaerobe, β-galactosidase, *Escherichia coli*, Thermostable enzyme, 302
Monitoring of cell growth
Plant cell culture, Medium conductivity measurement, 170
Monophastic organic solvents
Enzymatic catalysis, Biocatalysis, Enzyme transformation, Supercritical fluids, 194
Multiple forms
Geotrichum candidum, Lipase, Immunoelectrophoresis, 90
Mutant
Sclerotium rolfsii, Constitutive endoxylanase, 678
Myceliophthora thermophila D-14,
β-glucosidase, Immobilization, 431
Mycobacterium sp.
Aqueous two-phase system, Steroid transformation, Side-chain degradation, Androsta-,4-diene-3,17-dione, Cholesterol, 752
Polyphosphate : glucose-6-phosphotransferase, Glucose-6-phosphate, Inorganic polyphosphates, Immobilized enzyme reactor, 518
Side chain cleavage, Sterol, AD(D), NRRL-B 3683, Cyclodextrin, 398

NADH
Xylose reductase, NADPH, *Pachysolen tannophilus*, 662
NADPH
Xylose reductase, NADH, *Pachysolen tannophilus*, 662

Neurospora crassa
Exported proteins, Fungal amylases, 692
Nicotinic acid
Nocardia, 3-cyanopyridine Nitriles, Immobilized cells Biocatalyst, Bioreactor, 812
Nitrate reduction
Cofactor regeneration, Photochemical regeneration of NAD(P)H cofactors, Photoinduced biotransformations, Photosensitized NAD(P)H regeneration, CO2-fixation, 467
Nitriles
Nocardia, 3-cyanopyridine, Nicotinic acid, Immobilized cells, Biocatalyst, Bioreactor, 812
Nitrogen source
Hemoglobin, Hydrosylates, Protozoa, *Tetrahymena*, Culture, 165
S-(o-nitrophenyl)-L-cysteine Tyrosine phenol-lyase, L-tyrosine, L-tryosine, 80
Nocardia
3-cyanopyridine, Nitriles, Nicotinic acid, Immobilized cells, Biocatalyst, Bioreactor, 812
NRRL-B 3683
Side chain cleavage, Sterol, AD(D), *Mycobacterium* sp., NRRL-B 3683, 398
Nuclear magnetic resonance spectroscopy
20β-Keto reductase, *Arthrobacter simplex*, Prednisolone, 20β-hydroxyprednisolone, Mass spectroscopy, 116
Nucleotide sequences
Cellulases, Bacterial enzymes, Enzyme regulation, 626
Nutrients
Ethanol, Yeast, Thermotolerance, 411

Oleaginous yeasts
Sudan Black "B", *Rhodotorula gracilis*, Intracellular lipids, Staining, Absorbance, 252
On-line detection
Bicinchoninic acid (BCA), Cellulases, Fermentation, Flow injection analysis (FIA), Process monitoring, Protein assay, *Trichoderma*, 96
Operational stability
Reversed micelles, Biocatalysis in organic media, Hydrogenase, 668
Organic media
Microgels, Enzyme supports, α-chymotrypsin, Sulfatase, Esterase, 657
Organic solvent
Lipase, Chemical modification, Hydrolysis, Esterification, Ester exchange, 44
Organic solvent two-phase systems
Thermophilic proteins, Protein thermostability, Protein stability, Aqueous, 568
Oxidation
Citronellol, Horseradish peroxidase, 436
Oxygen transfer
Bubble column reactor, Air-lift reactor, Rotating drum reactor, Immobilized reactor, Membrane reactor, Plant cell culture, Secondary metabolite production, Mixing, Cell aggregation, Stirred tank reactor, 386

Pachysolen tannophilus
Xylose reductase, NADPH, NADH, 662
Packed-bed reactors
Hybridomas, Immobilization, Growth, Metabolism, 341
Palm kernel olein
Hydrolysis, Reversed micelle, 528
Passive immobilization
Glucoamylase, *Aspergillus awamori*, Cell immobilization, Reticulated foam, Spore immobilization, 495
Pectinesterase
Clarification process, Endo-D-polygalacturonase, Immobilized pectic enzymes, Coimmobilization of multienzyme systems, 831
Penicillium aculateum
Dextranase, Dextran, 533
Penicillium roqueforti
Methyl-ketone, 2-heptanone, Immobilized spores, 106
Peptide analysis
Ligninase, Lignin peroxidase, Lignin biodegradation, Hemeproteins Glycosylation, Extracellular enzymes, White rot, Wood decay, 322
Permeabilization
Kluyveromyces fragilis, β-galactosidase, Digitonin, Lactose, 439
Phlebia tremellosa
Delignification, Aspen, Enzymatic hydrolysis, 803
5′-Phosphodiesterase
Barley rootlets, 5′-ribonucleotides, 444
Phosphorus
Algae, Bioaccumulation, *Chlorella*, Immobilization, Kinetics, Uptake, 590
Phosphorylase
β-Glucosidase gene, Cloning, Expression, *Cellulomonas fimi*, pUC9, Cellobiose, PNPG, Glucose, 313
Photobiocatalysis
Amino acids photosynthesis, Photochemical dehydrogenation, Photoinduced H2-evolution, Biocatalysis, Nitrate reduction, Cofactor regeneration, Photochemical regeneration of NAD(P)H cofactors, Photoinduced biotransformations, Photosensitized NAD(P)H regeneration, CO2-fixation, 467
Photochemical dehydrogenation
Amino acids photosynthesis, Photoinduced H2-evolution, Biocatalysis, Photobiocatalysis, Nitrate reduction, Cofactor regeneration, Photochemical regeneration of NAD(P)H cofactors, Photoinduced biotransformations, Photosensitized NAD(P)H regeneration, CO2-fixation, 467
Photochemical regeneration of NAD(P)H cofactors
Amino acids photosynthesis, Photochemical dehydrogenation, Photoinduced H2-evolution, Biocatalysis, Photobiocatalysis, Nitrate reduction, Cofactor regeneration, Photoinduced biotransformations, Photosensitized NAD(P)H regeneration, CO2-fixation, 467
Photoinduced biotransformations
Amino acids photosynthesis, Photochemical dehydrogenation, Photoinduced H2-evolution, Biocatalysis, Photobiocatalysis, Nitrate reduction, Cofactor regeneration, Photochemical regeneration of NAD(P)H cofactors, Photosensitized NAD(P)H regeneration, CO2-fixation, 467
Photoinduced H2-evolution
Amino acids photosynthesis, Photochemical dehydrogenation, Biocatalysis, Photobiocatalysis, Nitrate reduction, Cofactor regeneration, Photochemical regeneration of NAD(P)H cofactors, Photosensitized NAD(P)H regeneration, CO2-fixation, 467
Photosensitized NAD(P)H regeneration
Amino acids photosynthesis, Photochemical dehydrogenation, Photoinduced H2-evolution, Biocatalysis, Photobiocatalysis, Nitrate reduction, Cofactor regeneration, Photochemical regeneration of NAD(P)H cofactors, Photoinduced biotransformations, CO2-fixation, 467
pH stability
α-Amylase, *Talaromyces emersonii* CBS 814.70, β-glucosidase, Thermal stability, 370
Pichia pastoris
Streptokinase, Plasminogen activation, Thrombolysis, Gene expression, 650
Pichia stipitis
Ethanol, Xylose fermentation, Spent sulfite liquor, Yeasts, 240
Plant cell
Alcohol dehydrogenase, Replication, Membrane, Deactivation, Ethanol, Yeast, Fungi, Bacteria, Acetaldehyde, Inhibition, Toxicity, 130
Plant cell biomass
C1 cellulase, Cx cellulase, β-glucosidase, Endopolygalacturonase, Filamentous fungi, 736
Plant cell culture
Monitoring of cell growth, Medium conductivity measurement, 170
Bubble column reactor, Air-lift reactor, Rotating drum reactor, Immobilized reactor, Membrane reactor, Secondary metabolite production, Mixing, Oxygen transfer, Cell aggregation, Stirred tank reactor, 386
Plant cells
Review, Immobilization, 546
Shear, Plant tissue culture, 484
Plant tissue culture
Plant cells, Shear, 484
Plasmid
Saccharomyces cerevisiae, Xylulokinase gene, *E. coli*, Complementation, Xylulose, Yeast xylulokinase mutant, 417
Plasminogen activation
Streptokinase, *Pichia pastoris*, Thrombolysis, Gene expression, 650
Plate and frame system
Diafiltration, Poly(ethylene glycol)4000, β-galactosidase, Hollow fiber system, 744
PNPG
β-Glucosidase gene, Cloning,

Expression, *Cellulomonas fimi*, pUC9, Cellobiose, Glucose, Phosphorylase, 313
Polarography
Fish, Freshness, Metabolite, Uric acid, 277
Polyacrylamide
Invertase, Yeast cells, Radiation polymerization, Crushing strength, 376
Poly(ethylene glycol)4000
Diafiltration, β-galactosidase, Plate and frame system, Hollow fiber system, 744
Poly(ethylene glycol)/potassium phosphate
β-galactosidase, Protein A, Fusion protein, Extraction, Aqueous two-phase system, Biomass, 730
Polyethylenimine
Flannel cloth, Glucose oxidase, Catalase, Adsorption, Egg melange, Desugaring, 617
Polyol
Alpha-amylase, Thermostability, Enzyme inhibitor, 673
Polyphosphate : glucose-6-phosphotransferase
Glucose-6-phosphate, Inorganic polyphosphates, *Mycobacterium* sp., Immobilized enzyme reactor, 518
Polysaccharides
Ethanol, Chitin, Acacia gum, Xylan Supplement, *Saccharomyces*, Sugar cane molasses, 38
Precipitation
Salt, α-Chymotrypsin, Activity, 264
Prednisolone
20β-Keto reductase, *Arthrobacter simplex*, 20β-hydroxyprednisolone, Nuclear magnetic resonance spectroscopy, Mass spectroscopy, 116
Process monitoring
Bicinchoninic acid (BCA), Cellulases, Fermentation, Flow injection analysis (FIA), On-line detection, Protein assay, *Trichoderma*, 96
Product inhibition
Butanol fermentation, Membrane, Extraction, Cell deactivation, 575
Propyl gallate
Tannase, Tannin, Food antioxidant, Reverse micelles, Transesterification, 604
Protein A
β-galactosidase, Fusion protein, Extraction, Aqueous two-phase system, Poly(ethylene glycol)/potassium phosphate, Biomass, 730
β-Lactamase, Hybrid protein, Expression, IgG binding, 559
Protein assay
Bicinchoninic acid (BCA), Cellulases, Fermentation, Flow injection analysis (FIA), On-line detection, Process monitoring, *Trichoderma*, 96
Protein purification
Thermostable cellulases, Carboxymethyl cellulase, β-glucosidase, Xylanase, β-xylosidase, Heat treatment, Denaturation, *Caldocellum saccharolyticum*, 113
Protein stability
Thermophilic proteins, Protein thermostability, Aqueous, Organic solvent two-phase systems, 568
Protein thermostability
Thermophilic proteins, Protein stability, Aqueous, Organic solvent two-phase systems, 568
Protoplast
Robillarda, Regenerants, CMCase, β-glucosidase, 696
Protoplast fusion
Aspergillus niger, divergent crosses, 2
Protoplasts
Lytic enzymes, *Trichoderma harzianum*, *Aspergillus nidulans*, 21
Protozoa
Hemoglobin, Hydrosylates, Nitrogen source, *Tetrahymena*, Culture, 165
pUC9
β-Glucosidase gene, Cloning, Expression, *Cellulomonas fimi*, Cellobiose, PNPG, Glucose, Phosphorylase, 313
Pullulan 6-glucanohydrolase
Pullulanase, α-amylase, starch saccharification, thermophilic *Bacillus* sp., 760
Pullulanase
Pullulan 6-glucanohydrolase, α-amylase, starch saccharification, thermophilic *Bacillus* sp., 760
Purification
Chitobiase, Chitinase, *Serratia liquefaciens*, Fermentation, 289
Pyruvate oxidase
Enzyme activity sensor, Glucose oxidase, Lactic dehydrogenase, Glucose, Lactic acid, 820

Quinoproteins
Gluconobacter oxydans, Gluconic acid, Glucose metabolism, 160

Radiation polymerization
Invertase, Yeast cells, Polyacrylamide, Crushing strength, 376
Reaction mechanism
Fructo-oligosaccharides, Fructosyltransferase, Disproportionation reactions, Mathematical model, 491
Recombinant *Escherichia coli*
Bioreactor, Recycle, Dense culture, 49
Recycle
Bioreactor, Dense culture, Recombinant *Escherichia coli*, 49
Regenerants
Robillarda, Protoplast, CMCase, β-glucosidase, 696
Replication
Ethanol, Yeast, Fungi, Plant cell, Bacteria, Acetaldehyde, Inhibition, Toxicity, Alcohol dehydrogenase, Membrane, Deactivation, 130
Resolving power
Enzyme photoimmobilization, Effective quantum yield, Amplification, Alkaline phosphatase of *E. coli* (EC 3.1.3.1), 507
Reticulated foam
Glucoamylase, *Aspergillus awamori*, Cell immobilization, Passive immobilization, Spore immobilization, 495
Reverse micelle
Extractive catalysis, Two-phase system, Equilibrium shift, Hydrolytic reaction, 84
Reversed micelle
Palm kernel olein, Hydrolysis, 528
Reversed micelles
Biocatalysis in organic media, Hydrogenase, Operational stability, 668
Biocatalysis in organic media, Hydrogenase, 6
Reverse micelles
Tannase, Tannin, Food antioxidant, Propyl gallate, Transesterification, 604
Reversion reaction
α-Mannosidase, Enzyme activity, Enzyme stability, 347
Review
Plant cells, Immobilization, 546
Rhodotorula
Sudan Black "B", Intracellular lipids, Staining, Absorbance, Oleaginous yeasts, 252
Rhodotorula rubra
Chiral liquid chromatography, Enantiomers, Asymmetric reduction, *Saccharomyces cerevisiae*, *Candida albicans*, 177
5′-ribonucleotides
5′-Phosphodiesterase, Barley rootlets, 444
Robillarda
Protoplast, Regenerants, CMCase, β-glucosidase, 696
Rotating drum reactor
Bubble column reactor, Air-lift reactor, Immobilized reactor, Membrane reactor, Plant cell culture, Secondary metabolite production, Mixing, Oxygen transfer, Cell aggregation, Stirred tank reactor, 386
Saccharification
Starch, Ultrafiltration reactor, Glucoamylase, 154
Trichoderma reesei, Steam pretreatment, Enzyme adsorption, Wheat straw, 500
Saccharomyces
Ethanol, Chitin, Acacia gum, Xylan, Supplement, Polysaccharides, Sugar cane molasses, 38
Saccharomyces cerevisiae
Chiral liquid chromatography, Enantiomers, Asymmetric reduction, *Rhodotorula rubra*, *Candida albicans*, 177
Xylulokinase gene, *E. coli*, Complementation, Xylulose, Yeast xylulokinase mutant, Plasmid, 417
Salmonella
Membrane, Antigen, Antibody, Detection, 645
Salt
Precipitation, α-Chymotrypsin, Activity, 264
Sawdust
Solid-state fermentation, Fungus, *Gloeophyllum trabeum*, 511
Scale-up
Catharanthus roseus, Serpentine, Selected cell line, Bioreactors, 329
Sclerotium rolfsii
Constitutive endoxylanase, Mutant, 678

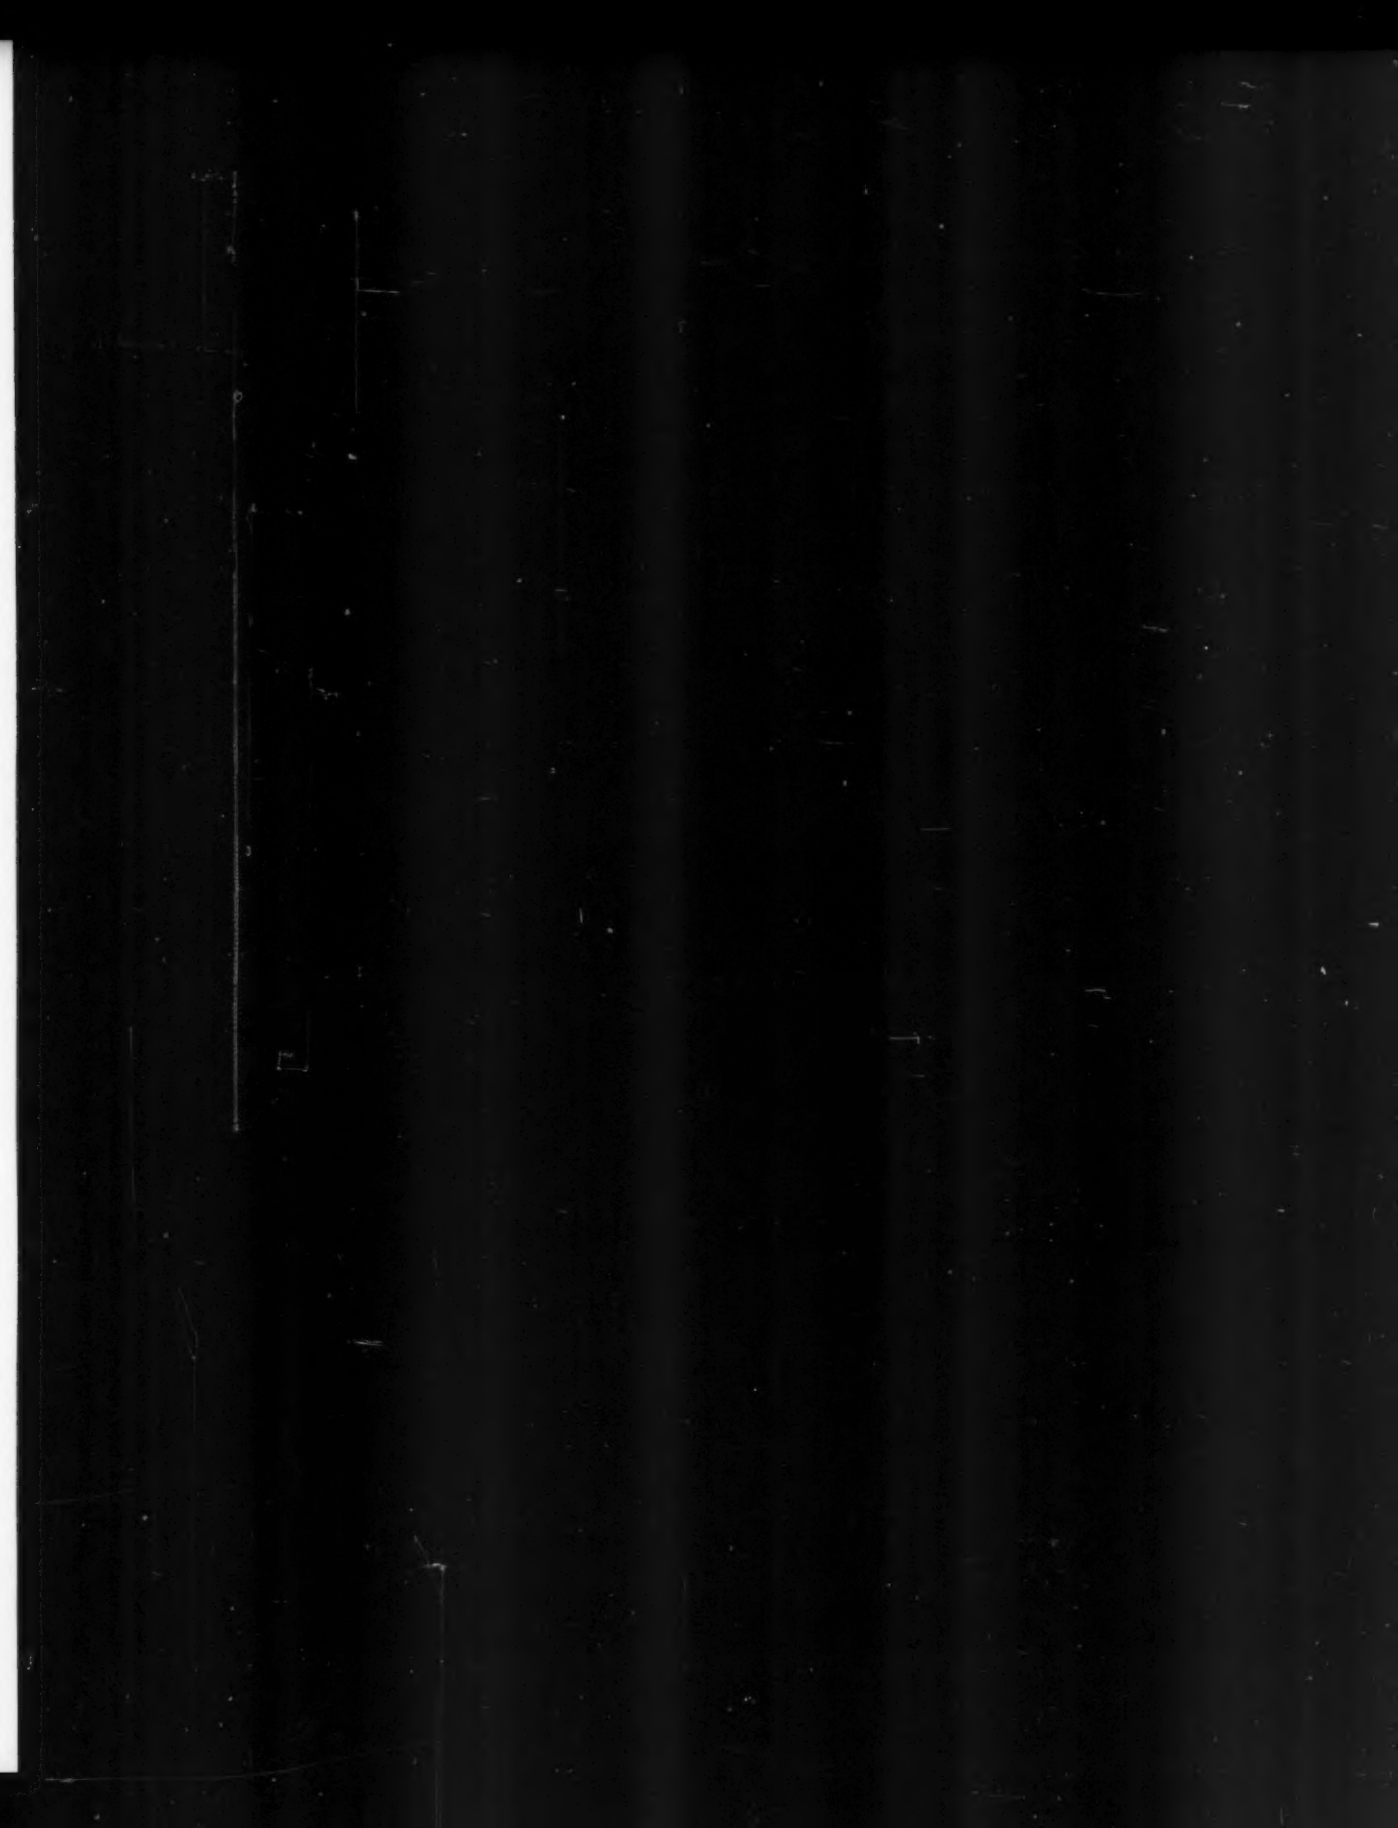
Secondary metabolite production
Bubble column reactor, Air-lift reactor, Rotating drum reactor, Immobilized reactor, Membrane reactor, Plant cell culture, Mixing, Oxygen transfer, Cell aggregation, Stirred tank reactor, 386
Selected cell line
Catharanthus roseus, Serpentine, Scale-up, Bioreactors, 329
Serpentine
Catharanthus roseus, Selected cell line, Scale-up, Bioreactors, 329
Serratia liquefaciens
Chitobiase, Chitinase, Purification, Fermentation, 289
Shear
Plant cells, Plant tissue culture, 484
Side chain cleavage
Sterol, AD(D), *Mycobacterium* sp., NRRL-B 3683, Cyclodextrin, 398
Side-chain degradation
Aqueous two-phase system, Steroid transformation, Androsta-,4-diene-3,17-dione, Cholesterol, *Mycobacterium* sp., 752
SiO2-carrier
Lactase, Glucose isomerase, Immobilization, 26
Size distribution
Microcapsule, Mean diameter, Microencapsulation, 29
Solid-state fermentation
Lignocellulose, Delignification, Digestibility, 786
Sawdust, Fungus, *Gloeophyllum trabeum*, 511
Solute diffusion
Immobilization of biocatalysts, Gel beads, Alginate, Carrageenan, 258
Spent sulfite liquor
Ethanol, Xylose fermentation, Yeasts, *Pichia stipitis*, 240
Spore immobilization
Glucoamylase, *Aspergillus awamori*, Cell immobilization, Passive immobilization, Reticulated foam, 495
Sporotrichum thermophile
Exocellulase, Cellobiohydrolase, Enzymes, 220
Stabilization of trypsin
Immobilization of trypsin, Trypsin (amine)-agarose(aldehyde) multiinteraction, Enzyme-support multipoint attachment, 353
Staining
Sudan Black "B", *Rhodotorula gracilis*, Intracellular lipids, Absorbance, Oleaginous yeasts, 252
Starch
Ultrafiltration reactor, Saccharification, Glucoamylase, 154
Starch saccharification
α-amylase, Thermophilic *Bacillus* sp., Pullulanase, Pullulan 6-glucanohydrolase, 760
Starter culture
Freeze-drying, Activity loss, 765
Steam pretreatment
Trichoderma reesei, Enzyme adsorption, Saccharification, Wheat straw, 500
Steroid transformation
Aqueous two-phase system, Side-chain degradation, *Mycobacterium* sp., Androsta-,4-diene-3,17-dione, Cholesterol, 752
Sterol
Side chain cleavage, AD(D), *Mycobacterium* sp., NRRL-B 3683, Cyclodextrin, 398
Stirred tank reactor
Bubble column reactor, Air-lift reactor, Rotating drum reactor, Immobilized reactor, Membrane reactor, Plant cell culture, Secondary metabolite production, Mixing, Oxygen transfer, Cell aggregation, 386
Streptococcus faecalis var. zymogenes
Microbial growth, Hollow fiber reactor, Electronic pressure sensor, 283
Streptokinase
Plasminogen activation, *Pichia pastoris*, Thrombolysis, Gene expression, 650
Sucrose
Fructosyl transferase activity, Levansucrase, Disaccharide synthesis, Trisaccharide synthesis, *Bacillus subtilis*, 212
Sudan Black "B"
Rhodotorula, Intracellular lipids, Staining, Absorbance, Oleaginous yeasts, 252
Sugar cane molasses
Ethanol, Chitin, Acacia gum, Xylan, Supplement, Polysaccharides, *Saccharomyces*, 38
Sulfatase
Microgels, Enzyme supports, α-chymotrypsin, Esterase, Organic media, 657
Supercritical fluids
Enzymatic catalysis, Biocatalysis, Enzyme transformation, Monophastic organic solvents, 194
Supplement
Ethanol, Chitin, Acacia gum, Xylan, Polysaccharides, *Saccharomyces*, Sugar cane molasses, 38
Surface properties
Anchorage-dependent BHK cells, Microcarriers, Kinetic models, 825
Suspended mammalian cells
Gas-liquid interface, Bubbles, 230

Talaromyces emersonii
Cellulase, Exocellobiohydrolase, Methylumbelliferyl β-D-cellobiopyranoside, 17
Talaromyces emersonii CBS 814.70
α-Amylase, β-glucosidase, pH stability, Thermal stability, 370
Tannase
Tannin, Food antioxidant, Reverse micelles, Propyl gallate, Transesterification, 604
Tannin
Tannase, Food antioxidant, Reverse micelles, Propyl gallate, Transesterification, 604
Tetrahymena
Hemoglobin, Hydrosylates, Nitrogen source, Protozoa, Culture, 165
Thermal stability
α-Amylase, *Talaromyces emersonii* CBS 814.70, β-glucosidase, pH stability, 370
Thermoanaerobacter
β-galactosidase, Thermophile, 180
Thermophile
β-galactosidase, *Thermoanaerobacter*, 180
Thermophilic anaerobe
β-galactosidase, *Escherichia coli*, Molecular cloning, Thermostable enzyme, 302
Thermophilic *Bacillus* sp.
Pullulanase, Pullulan 6-glucanohydrolase, α-amylase, Starch saccharification, 760
Thermophilic proteins
Protein thermostability, Protein stability, Aqueous, Organic solvent two-phase systems, 568
Thermostability
Alpha-amylase, Polyol, Enzyme inhibitor, 673
Thermostable cellulases
Carboxymethyl cellulase, β-glucosidase, Xylanase, β-xylosidase, Heat treatment, Protein purification, Denaturation, *Caldocellum saccharolyticum*, 113
Thermostable enzyme
Thermophilic anaerobe, β-galactosidase, *Escherichia coli*, Molecular cloning, 302
Thermotolerance
Ethanol, Yeast Nutrients, 411
Thrombolysis
Streptokinase, Plasminogen activation, *Pichia pastoris*, Gene expression, 650
Toxicity
Alcohol dehydrogenase, Replication, Membrane, Deactivation, Ethanol, Yeast, Fungi, Plant cell, Bacteria, Acetaldehyde, Inhibition, 130
Transesterification
Tannin, Tannase, Food antioxidant, Reverse micelles, Propyl gallate, 604
Trichoderma
Bicinchoninic acid (BCA), Cellulases, Fermentation, Flow injection analysis (FIA), On-line detection, Process monitoring, Protein assay, 96
Trichoderma harzianum
Lytic enzymes, Protoplasts, *Aspergillus nidulans*, 21
Trichoderma longibrachiatum
Xylanase, Cellulase, Hemicellulase, 405
Trichoderma reesei
Steam pretreatment, Enzyme adsorption, Saccharification, Wheat straw, 500
Trisaccharide synthesis
Fructosyl transferase activity, Levansucrase, Disaccharide synthesis, Sucrose, *Bacillus subtilis*, 212
Trypsin (amine)-agarose(aldehyde) multiinteraction
Immobilization of trypsin, Stabilization of trypsin, Enzyme-support multipoint attachment, 353
Two-phase system
Extractive catalysis, Equilibrium shift, Reverse micelle, Hydrolytic reaction, 84

L-tyrosine
Tyrosine phenol-lyase, S-(o-nitrophenyl)-L-cysteine, 80
Tyrosine phenol-lyase
L-tyrosine, S-(o-nitrophenyl)-L-cysteine, 80

Ultrafiltration reactor
Starch, Saccharification, Glucoamylase, 154
Upflow floc fermenter
Bacilli, Flocculation, Cell retention, 597
Uptake
Algae, Bioaccumulation, *Chlorella*, Immobilization, Kinetics, Phosphorus, 590
Uric acid
Polarography, Fish, Freshness, Metabolite, 277

Wheat straw
Trichoderma reesei, Steam pretreatment, Enzyme adsorption, Saccharification, 500
White rot
Ligninase, Lignin peroxidase, Lignin biodegradation, Hemeproteins, Glycosylation, Extracellular enzymes, Wood decay, Peptide analysis, 322
Wood decay
Ligninase, Lignin peroxidase, Lignin biodegradation, Hemeproteins, Glycosylation, Extracellular enzymes, White rot, Peptide analysis, 322

Xylan
Ethanol, Chitin, Acacia gum, Supplement, Polysaccharides, *Saccharomyces*, Sugar cane molasses, 38
Xylanase
Thermostable cellulases, Carboxymethyl cellulase, β-glucosidase, β-xylosidase, Heat treatment, Protein purification, Denaturation, *Caldocellum saccharolyticum*, 113
Trichoderma longibrachiatum, Cellulase, Hemicellulase, 405
Xylose fermentation
Ethanol, Spent sulfite liquor, Yeasts, *Pichia stipitis*, 240
Xylose isomerase
Fermentation, Lignocellulose, Hydrosylate, Yeast, 583
Xylose reductase
NADPH, NADH, *Pachysolen tannophilus*, 662
β-xylosidase
Heat treatment, Protein purification, Denaturation, *Caldocellum saccharolyticum*, Thermostable cellulases, Carboxymethyl cellulase, β-glucosidase, Xylanase, 113
Xylulokinase gene
Saccharomyces cerevisiae, *E. coli*, Complementation, Xylulose, Yeast xylulokinase mutant, *Plasmid*, *417*
Xylulose
Saccharomyces cerevisiae, Xylulokinase gene, *E. coli*, Complementation, Yeast xylulokinase mutant, Plasmid, 417


Yeast
Alcohol dehydrogenase, Replication, Membrane, Deactivation, Ethanol, Fungi, Plant cell, Bacteria, Acetaldehyde, Inhibition, Toxicity, 130
Ethanol, Thermotolerance, Nutrients, 411
Fermentation, Lignocellulose, Hydrosylate, Xylose isomerase, 583
Yeast cells
Invertase, Polyacrylamide, Radiation polymerization, Crushing strength, 376
Yeasts
Ethanol, Xylose fermentation, Spent sulfite liquor, *Pichia stipitis*, 240
Yeast xylulokinase mutant
Saccharomyces cerevisiae, Xylulokinase gene, *E. coli*, Complementation, Xylulose, Plasmid, 417
